

Captain Paul S. Rouffaer (RNLN)

Captain Paul Rouffaer served as the chief weapon engineering officer on board of various frigates of the Royal Netherlands Navy. Shore duties included: Missile Integration Manager at the international (12 nation-) NATO SEASPARROW Project Office (NSPO) in Washington DC, Program Manager for the Canadian-German-Netherlands APAR multifunction radar development, and Program Manager for the German-Netherlands Maritime Theater Ballistic Missile Defense program. Captain Rouffaer serves since 2008 as the international Deputy Program Manager at NSPO. NSPO manages the development, production and in-service phases of the NATO SEASPARROW Surface Missile System and the Baseline and Block 2 variants of the Evolved SEASPARROW Missile (ESSM).
